## FORM ASSEMBLY

A web form creation and integration solution that allows users to create an unlimited number of forms from their browsers.

A free and open-source set of tools which help organizations author, field, and manage mobile data collection solutions.

An integration that is designed to make it simple for CRM users to send, receive and manage their text messaging conversations, while seamlessly accessing the power of their CRM.

An advanced mobile data platform to help organizations enhance data collection, monitoring, sales and inventory management in the field.

A field-tested technology platform that helps users to collect data using mobile phones, tablets, or computers. Collect data online or offline, access your data as soon as it's collected, keep your data secure, and ensure data quality.

An open source mobile data collection platform that enables anyone to build mobile apps. CommCare is the most widely adopted and evidence-based mobile platform for low-resource settings.

A cloud storage service for storing and sharing files.

The world's #1 Customer Relationship Management (CRM) platform which includes cloud-based applications for sales, service, marketing, and more.

An open source software platform enabling governments and organizations to collect, manage and analyze data in the health domain and beyond.

A cloud storage and file management program developed by Google that allows users to store up to 15 GB of files for free.

Box lets you secure, share and edit all your files from anywhere.

Tableau can help anyone see and understand their data. Connect to almost any database, drag and drop to create visualizations, and share with a click.

An interactive web service that creates a wide range of charts based on data supplied by users.

A cloud-based business analytics service that gives you a single view of your most critical business data. Monitor the health of your business using a live dashboard, create rich interactive reports with Power BI Desktop and access your data on the go with native Power BI Mobile apps.

A free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS.

A complete, integrated statistical software package that provides everything you need for data analysis, data management, and graphics.

Please note that the list above was developed to introduce MNN attendees to a segment of the tools landscape and is not exhaustive. Vera Solutions, Dimagi, and GAIA are unable to make tool recommendations without a deeper understanding of an organization's needs.
