

# Measuring Impact

Philanthropic Solutions · National Consulting and Advisory Practice

## WORKSHEET:

Think about an initiative you are currently undertaking, or are considering

	What you are doing/planning to do?	What resources do you have? (+) What resources do you need? (-)	What are questions you still have to answer before you can move forward?
What are the conditions you are trying to change?			
What are the long-term (big) indicators of success? i.e., what will you measure or track that will show that your initiative met its intended goal(s)?			
What are intermediate (shorter-term) indicators?			

	What you are doing/planning to do?	What resources do you have? (+) What resources do you need? (-)	What are questions you still have to answer before you can move forward?
Are there changes that you are looking for that you don't know how to measure?			
How are you involving the voices/perspectives of the community in your evaluation process? At the beginning? At intermediate stages? In final stages?			
What kind of monitoring will you do? (reports, site visits, external reviews, e.g.)			
What milestone/event/missed milestone is a "deal breaker" for you? (i.e., would consider stopping or radically changing your initiative?)
